

ELDER FINANCIAL SAFETY CENTER

A collaborative partnership of The Senior Source, Dallas County Probate Courts and District Attorney's Office

Working Families Success Model Three Core Services

At the *Elder Financial Safety Center*, through the prevention services offered at The Senior Source, we help adults 50 and over of all income levels and backgrounds tackle many of the same challenges of low-income young adults and working families. Our deliberate and thorough approach to confronting financial insecurity among older adults who have the added threat of financial exploitation, frauds and scams include the three core services: financial security through employment, financial stability through income support and longer term financial wellness through coaching and counseling.

We cultivate partnerships with employers increasing awareness of the benefits of hiring mature workers, and develop job leads updated in real time in a database accessible from anywhere with a password.

We offer skills assessment, computer training, and specialized programming for distinct populations within the client base we serve.

We host workshops, networking events, job fairs, hiring fairs and more for our clients ensuring opportunity to succeed.

We have a dedicated benefits specialist who screens, assists and follows up with clients at their time of renewal ensuring there is not a disruption to their benefits support.

We partner with nonprofits and corporations to provide one-time and short-term financial assistance while working toward longer term financial security.

We have more than 50 years of resource knowledge shared with clients for housing, food and other needs.

We provide unbiased, professional coaching and counseling on diverse financial topics, frauds, scams and exploitation with a goal to increase assets and decrease liabilities.

We partner with industry experts filling gaps in service including debt management and legal support.

We facilitate best-practice group education in the community and onsite.

We use and create best-practice tools as leaders in the aging industry.
